

**In the Claims**

Claim 1. (Twice Amended). An apparatus comprising:

at least one processor;

a memory coupled to the at least one processor; and

a computer program residing in the memory, said computer program downloading a web page file comprising~~(text portions)~~and a plurality of page component references, the computer program displaying the text portions of the web page file, and the computer program dynamically prompting a user to select which of a plurality of page components associated with the plurality of page component references to download and integrate into the displayed text portions of the web page file [when downloading a file referencing the plurality of page components].

Claim 3. (Amended). The apparatus of claim 1 wherein said web page file comprises a hypertext markup language (HTML) document.

Claim 4. (Twice Amended). The apparatus of claim 1 wherein said computer program includes a component download selection mechanism, said component download selection mechanism dynamically creating a component download selection list from said plurality of page component references [when said file with said plurality of page components is downloaded].

Claim 5. (Amended). The apparatus of claim 4 wherein said computer program comprises a web browser and wherein the text portions of the web page file are displayed in a first pane of said web browser said component download selection list is formed in a second pane of said web browser [and displayed with said file].

Claim 7. (Amended). The apparatus of claim 4 wherein the component download list is [inserted into said file and] displayed to [a] the user with said text portions of the web page file.

Claim 13. (Twice Amended). A method for [downloading a] building a web page [, the page including a document with references to a plurality of components, the method] comprising the steps of:

- a) downloading a web page file comprising text portions and a plurality of page component references [said document];
- b) displaying the text portions of the web page file on the web page;
- c) prompting a user to select which of [said] a plurality of page components associated with said plurality of page component references to download; [and]
- d) [c)] downloading said selected page components; and
- e) integrating said selected page components into the web page.

Claim 14. (Amended). The method of claim 13 wherein the [document] web page file comprises an HTML document.

Claim 15. (Twice Amended). The method of claim 13 wherein the step of prompting a user to select which of [said] a plurality of page components to download comprises displaying a component download selection list.

Claim 17. (Amended). The method of claim 15 wherein said component download selection list [comprises] is displayed in a pane in a web browser.

Claim 18. (Amended). The method of claim 15 wherein said component download selection list is displayed with the text portions of the web page file on the web page [inserted into said document].

Claim 22. (Twice Amended). The method of claim [13] 15 wherein said component download selection list comprises a status item, said status item dynamically displaying the amount of each of said plurality of page components that has been downloaded.

Claim 24. (Twice Amended). A program product comprising:

- (A) a computer program, said computer program capable of downloading a web page file comprising text portions and a plurality of page component references, said computer program capable of displaying the text portions of the web page file, and the computer program capable of dynamically prompting a user to select which of a plurality of page components associated with said plurality of page component references to download and integrate into the displayed text portions of the web page file [when downloading a file referencing the plurality of page components]; and
- (B) signal bearing media bearing said computer program [download selection mechanism].

Claim 25. (Twice Amended). The program product of claim 24 wherein said computer program includes a component download selection mechanism, said component download selection mechanism dynamically creating a component download selection list from said plurality of page component references [when said file with said plurality of page components is downloaded].

Claim 30. (Amended). The program product of claim 25 wherein the component download list is [inserted into said file and] displayed to [a] the user with said text portions of the web page file.

Claim 31. (Amended). The program product of claim 24 wherein said web page file comprises a hypertext markup language (HTML) document.

Claim 32. (Twice Amended). The program product of claim 25 wherein said component download selection list [contains] comprises the file name for each of said plurality of page components.

Claim 33. (Twice Amended). The program product of claim 25 wherein said component download selection list [contains] comprises the type for each said plurality of page components.

Claim 34. (Twice Amended). The program product of claim 25 wherein said component download selection list [contains] comprises the size of each said plurality of page components.

Claim 36. (Amended). An apparatus comprising:

at least one processor;

a memory coupled to the at least one processor; and

a web browser application residing in the memory, said web browser application including a component download selection mechanism, said component download selection mechanism downloading a web page file comprising text portions and a plurality of page component references, said component download selection mechanism displaying the text portions of the web page file, said component download selection mechanism dynamically creating a component download selection list from said plurality of page component references, and [when an HTML document with a plurality of components is downloaded,] said component download selection mechanism prompting a user to select which of said plurality of components on the component download selection list to download and integrate with the displayed text portions of the web page file.

Claim 37. (Amended). A method for downloading and displaying a web page [an HTML document from a web server to a web browser, the document including a document with references to a plurality of embedded components, the method] comprising the steps of:

- a) requesting an HTML document from a web server;
- b) parsing said HTML document for text portions and for references to [said] a plurality of embedded components;
- c) displaying the text portions;
- d) prompting a user to select which of said plurality of embedded components to download by displaying a component download selection list comprised of the plurality of references [on said web browser]; [and]
- e) [d)] receiving at least one user selected reference that the user is requesting be downloaded;
- f) downloading the embedded components associated with said at least one user selected reference that the user is requesting from said web server [said selected embedded components]; and
- g) integrating the downloaded embedded components with the displayed text portions.
